

Health, Safety and Environmental Policy

It is a primary aim of our business to prevent losses, manage our risks and protect people and the environment. We will achieve this by meeting our legal and other obligations, applying best practice, meeting the needs of our employees and stakeholders, identifying and managing health, safety and environmental hazards and risks, implementing control measures and continually improving our performance.

We believe that every accident is preventable.

- Our aim is for a safe and healthy working environment with zero injuries and ill health
- We aim to operate a sustainable business that protects the environment and prevents pollution

We will ensure:

- Ownership for health, safety and environment issues is a shared responsibility between management and the workforce
- Line managers identify and manage risks and implement control measures to prevent losses, incidents, damage, accidents, injuries, ill health, waste and pollution
- Safe working practices are developed and implemented
- That appropriate information, instruction, supervision and training is provided
- Waste is reduced, reused, recycled or energy-recovered
- Our energy and carbon emissions are managed
- We will use resources and raw materials efficiently
- Our products are safe for people and the environment
- Our management systems are continually improved
- We involve, consult and communicate with the workforce

Everyone is expected to behave responsibly, work safely, co-operate and comply with this policy
